I have been asked by management to keep them informed of our progress. They are interested in what we have accomplished on each task. They asked to have the information in terms of % complete for each task. But I understand that can be difficult to estimate. So I will be asking you on a regular basis (every other week, maybe) to provide the type of progress report that Dan provided below. For now it can be very qualitative. As we accomplish more I will probably ask for more quantitative reports, if that is possible and applicable.

So...can you each let me know what you have accomplished so I can report to the managers?

Thanks Phil

Subject: next week's meeting, etc.

Hey Phil,

As for that GIS teleconference next week, we'd be available any time except Wednesday afternoon. Just let us know what's going to work for everyone else.

As for my task update, I'm reviewing literature on the temporal and spatial distribution of Bristol Bay salmon in the North Pacific and Bering Sea and on the role of salmon in the marine food web. I've compiled the sources I need to get started and I'll begin drafting the section this week.

Dan
